## ***Cyber and Control Systems Security Awareness Training***

---

**Date:** Thursday, February 11, 2010  
**Time:** 9:00 am – 3:00 pm  
**Location:** Washington Group Plaza Auditorium  
720 E. Park Boulevard  
Boise, ID 83712

### **Who should attend**

The Cybersecurity training is a fast-paced course covering control systems cyber security challenges. The training objectives include helping participants understand the importance of securing control systems, how attacks against control systems can be launched, and the mitigation strategies available to secure systems. This training is geared towards organizational executive leadership, directors, CEOs, and related positions, as well as those in IT Management, IT Security, CISOs, CSOs, and other security professionals. Specific topics will include:

- The importance of protecting control systems from cyber attacks and why they are susceptible
- Understanding common vulnerabilities, risks and potential consequences of attacks
- Discussion of system exposures to attacks, various attack scenarios, and associate mitigation strategies
- Control System Security Program services and products, including the Cyber Security Evaluation Tool (CSET) that is available to asset owners.
